Question

THE FOUNDATION FOR ADVANCEMENTS IN SCIENCE AND EDU**95-3711811****Program Services**

Achievement	Pgm. Svc. Exp.
<p>Environmental Programs, General/Other Green Technology Mission - This Foundation initiative was established to help government create clean and sustainable communities. It has several purposes: * To promote solutions - products, processes and services - that will bring about clean and sustainable communities; * To create jobs that relate to building clean and sustainable communities; * To foster the development of new technologies and new career opportunities by popularizing implementation of state and local sustainability programs. Activities - In early 2006 FASE staff began a project to collate and evaluate information regarding state and local government programs to forward or implement sustainable technologies. It soon became evident that the state of California was setting the pace for efforts in other states, and that the marketplace was large enough to sustain a conference. Staff next undertook a series of meetings with state government officials responsible for the execution and supervision of programs in energy efficiency, green building and environmentally preferable purchasing. This work revealed that a conference, or Summit, was needed to increase understanding of existing programs and to forward their implementation, and to gain broad support for the goal of a "Green California," an undertaking which involves virtually every state employee. An Advisory Board was formed, composed of senior officials responsible for the state's sustainability programs. This group provided insight and guidance in the development of the agenda for the Summit and the contents of its education and training program. At the same time, the Green Technology initiative launched a publishing program, focused on a web-based publication reporting on innovative and effective sustainability programs. The purpose for this activity was to capture the elements of successful programs and to provide officials throughout the state (and the nation) with concrete examples that could inform their own efforts. Writers for the magazine captured details of the groundbreaking programs in California, and soon found that there was a wide audience for such stories. Through the Green Technology website, as well as electronic "newsletters," this unique content was soon reaching thousands of readers. In the fall, at the request of Summit advisors, Green Technology organized an Executive Forum in Sacramento, to bring together senior state officials and representatives of Investor-Owned Utilities (IOUs) in the state. The Forum provided a venue for the IOUs, and their partners in state government, to release a new program that would provide grants for energy efficiency projects in state facilities. Dozens of senior state officials attended and gained information and insight essential to the implementation of the new program. At this event, a hard copy reprint of major stories from Green Technology magazine was released. This magazine, the most comprehensive, readable account of state programs published to date was subsequently distributed throughout state agencies and departments. Throughout the fall, staff made regular visits to Sacramento, to stay abreast of developments in regard to state sustainability programs for both editorial and planning purposes. As the year came to an end, project staff were completing work on the education program for the March Summit, working intensively with technical experts at state agencies as well as and public and private utilities (20200 Persons).</p>	\$359,289 00
Grants and Allocations:	\$0.00 This amount includes foreign grants: N/A
<p>Environmental Health Programs Environmental Health Pesticide Project - Since 1990, the Foundation has been the primary public record source of detailed information on the export of banned and other hazardous pesticides from US ports. The project has focused on shipments of such products to ports in the developing world, where pesticide over-use, unsafe storage practices and lack of appropriate protective equipment greatly increase their risk. FASE was present for the Second Conference of the Parties (COP2) to the Rotterdam Convention, held in Geneva, Switzerland. The most critical issue before the Parties at this meeting was a decision regarding the inclusion of the chrysotile form of asbestos on the list of chemicals subject to the information exchange procedures of the treaty. To illuminate potential conflicts between political and environmental health issues, and to advocate for adherence to the treaty's goals, the project director published an editorial in the International Journal of Occupational and Environmental Health. This paper was distributed to all delegates prior to COP2. A paper summarizing exports between 2001 and 2003 was completed and submitted to the International Journal of Occupational and Environmental Health. Education, General/Other Improving Mathematics and Science Education Each year, this country's high tech industries must import tens of thousands of workers, to fill jobs for which they can find no qualified American graduates In an economy driven by technological innovation, skills in science and mathematics are essential While there are signs of improvement, American students continue to lag behind their counterparts in other developed countries The Foundation has produced more than 70 educational video programs designed to invigorate mathematics and science instruction These programs are designed to answer the question, "Why do I need to learn this? By introducing students to hundreds of professionals, working in fields ranging from ocean exploration to fashion design, they raise student awareness of the astonishing variety of applications for math and science concepts These materials have received more than 150 awards, and have three times received the highest honor in broadcasting, The George Foster Peabody Award Independent studies have verified that when they are integrated into classroom teaching, FASE programs have a dramatic impact on student interest in mathematics and science They have also been shown to improve student performance FASE has also produced some of America's most widely-used staff development videos At schools throughout the country, principals and staff development specialists use the FASE documentary "Good Morning Miss Toliver" to inspire and motivate teachers, and to demonstrate how a master teacher develops "mathematical thinking" in her students The series "Teacher Talk," also featuring Presidential and Disney award winner Kay Toliver, has been used to help teachers at districts throughout the country develop the ability to deliver lessons that engage student interest and attention As an ongoing activity, Foundation staff work to ensure that teachers are aware of these materials and that they are implemented in programs to improve student performance and teacher skill In addition to video materials, over the years the Foundation has developed a variety of teacher training activities, ranging from workshops to multi-day institutes A recent example is Algebra in the Real World, created to help teachers bring life to a subject that students often find to be abstract and boring	\$96,978 00
